

Zinc-Over Plastic Faucet

2026

ZINC-OVER-PLASTIC FAUCET CORE ADVANTAGES

Efficient Production

With in-house mold development plastic parts production and zinc alloy die-casting, we achieve stable quality, high efficiency and better delivery control.

Safety

The plastic-isolated waterway helps prevent heavy metal release and ensures safer drinking water.

DWD-READY

Low Cost

Made from zinc and plastic materials, it costs much less than brass and stainless steel.

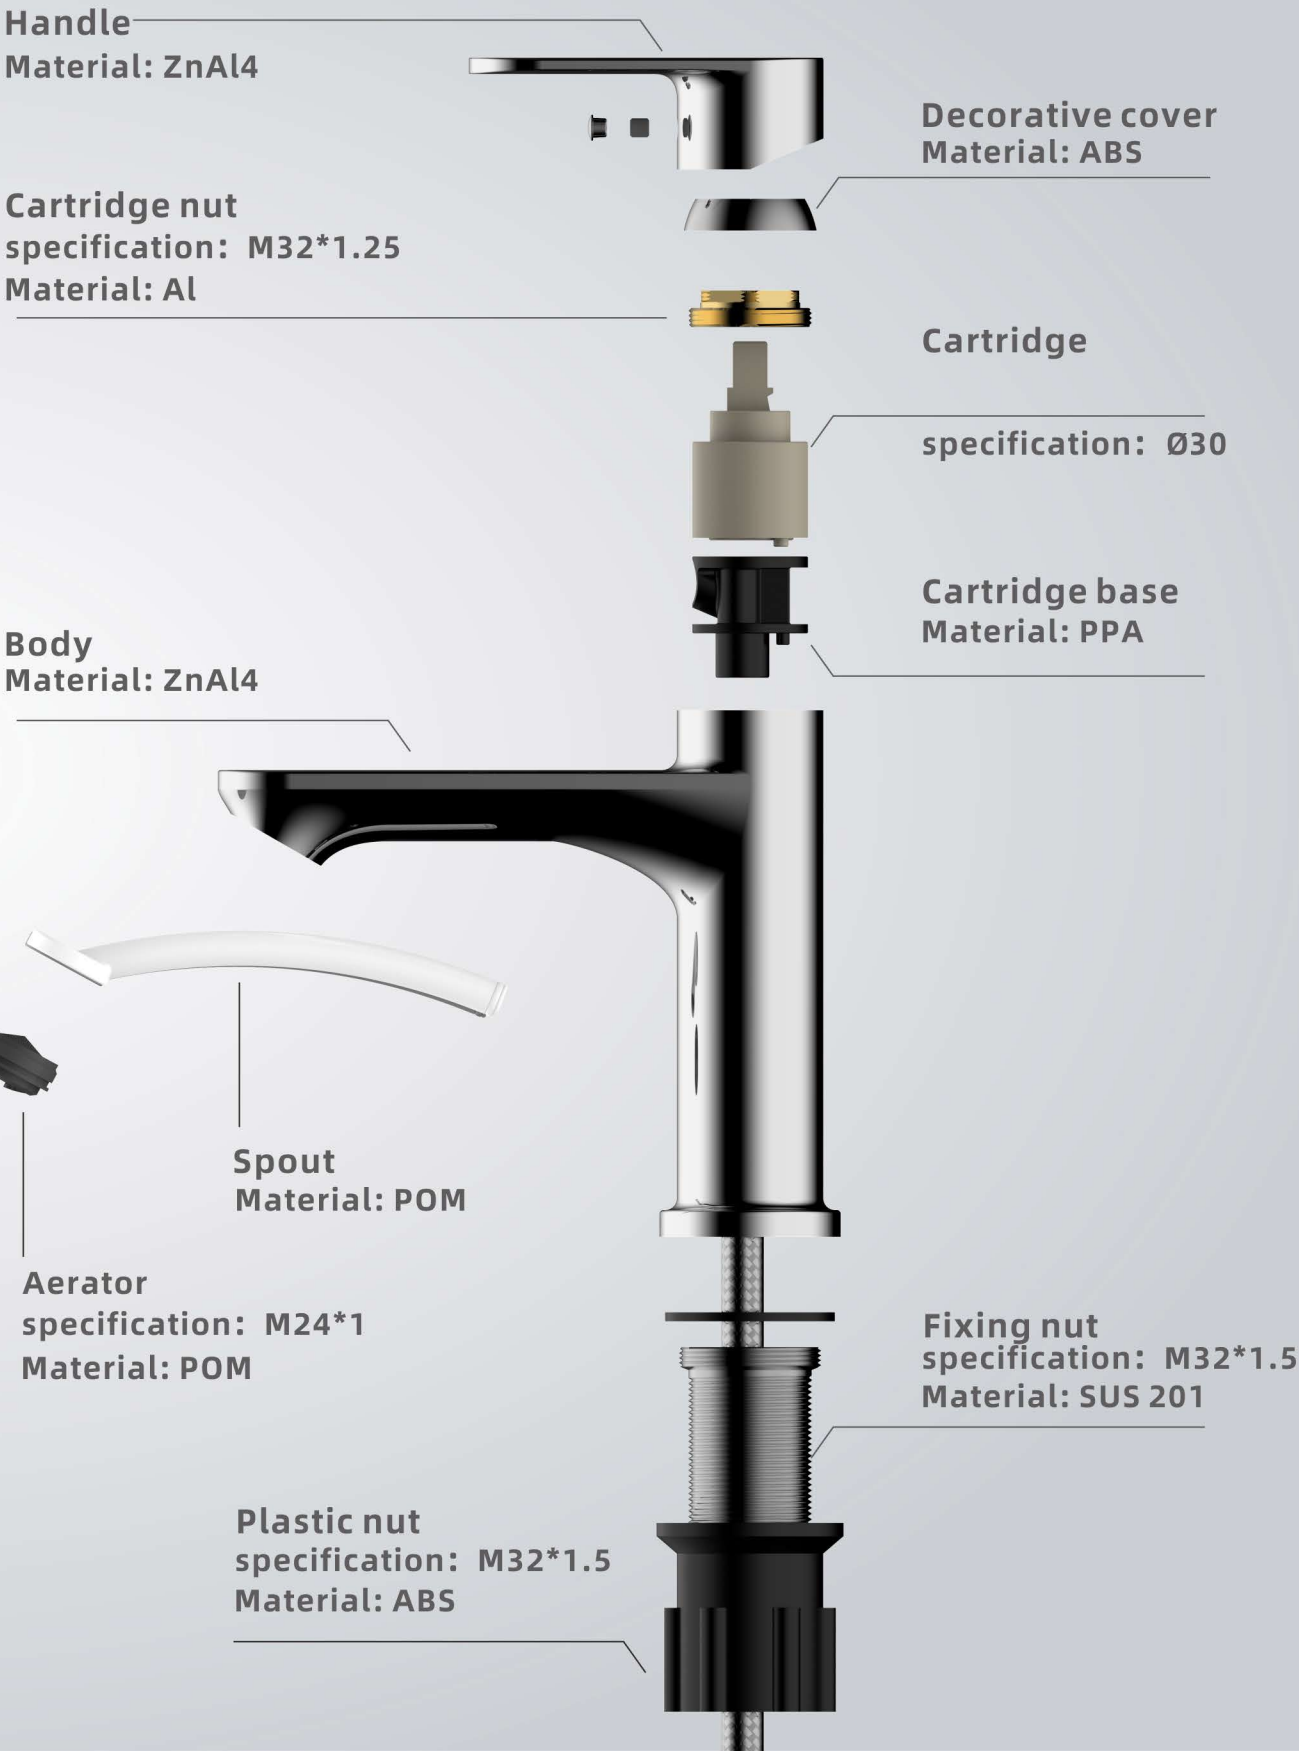

Structural Details

Zinc-over Plastic Faucet

- Lead-free & eco-friendly
- 7-layer plating
- Thermal insulation & anti-scalding
- 200-hour neutral salt spray (NSS), Grade 10
- DWD Complied

REDEFINE QUALITY CREATE
VALUE WITH THE
PERFECT BLEND OF ART
AND FASHION

It will inject endless charm

Meticulously selected materials, paired with strict craftsmanship, ensure that the products are healthy and environmentally friendly, in line with the concept of a green lifestyle. We offer a rich variety of color choices, such as the stylish coolness of modern black, the pure elegance of avant-garde white, and the luxurious grandeur of sophisticated gold, to meet your personalized aesthetic needs and make your bathroom space reflect unique taste.

HB 902-673 SERIES

Designed with the concept of "elegant luxury and a blend of square and soft elements," this sink faucet integrates modern geometric aesthetics with a comfortable feel when in use, resulting in a bathroom fixture that is both aesthetically pleasing and practical. Its design features a combination of square and circular shapes: the main shaft is straight and sleek, while the flat, elongated spout and the control handle in the same shape complement each other, creating a harmonious visual balance. The base has a slightly square shape, with rounded edges that add a touch of softness to the otherwise modern design, thus enhancing both the visual appeal and the comfort of holding it.

Haiba

Designed with the concept of "minimalist cylindrical aesthetics and a sophisticated side-control mechanism", this sink faucet returns to pure geometric forms, creating a bathroom fixture that combines visual appeal with practical comfort. It features an integrated cylindrical body without any unnecessary decorations; its smooth curves and balanced proportions convey a sense of elegance and restraint. The spout has a gentle, natural curve, with smooth lines that blend seamlessly with the cylindrical body, adding subtle touches of softness to the otherwise rigid geometric design. This faucet is suitable for various bathroom styles such as modern minimalist, industrial, and Nordic designs, bringing a refined and sleek appearance to washing areas.

HB 813-803
SERIES

This faucet embodies the modern design philosophy of "minimalist lines combined with superior quality." It is based on simple geometric shapes, and it integrates practical functionality with elegant aesthetics to create a hardware item suitable for contemporary bathroom spaces. The design features an integrated cylindrical structure, along with a flat, streamlined spout and a control handle that match its shape; these elements work together to create a harmonious visual balance. The end of the spout tapers naturally, with smooth curved transitions, and all edges have been softened, thereby adding subtle touches of warmth to the otherwise sleek modern design. It also takes into account the comfort of handling and safety in use. By eliminating any unnecessary decorative elements, this faucet conveys a refined and sophisticated design through pure lines and balanced proportions.

It features an integrated cylindrical main structure, paired with a flat and streamlined spout as well as a control handle of the same design; the lines of these elements are harmonious and unified, with smooth curved transitions that ensure a precise balance between visual lightness and structural stability. There are no unnecessary decorative elements, and the pure, streamlined design conveys a clean and modern aesthetic.

A BRAND-NEW TOUCH AND EXQUISITE DEPICTION

The circle, a shape that can be called perfect, transcends the limitations of style and fashion and is reflected in all the items of this series. However, it is precisely those exquisitely crafted metal materials that reinforce the free design concept of creating a space that makes people feel extremely comfortable.
