Haiba®
Haiba Sanitary Wares

**Kitchen
faucet system**

Small kitchen, big joy.

Those little sounds
piece together
the most
peaceful life.

The Haiba kitchen faucet can meet your wishes and expectations, with user-centered features and unique, meticulous craftsmanship that make it stand out. More choices, more comfort, more flexibility—this is exactly the joy of using our products.

Features of Haiba Kitchen

Window Installation
When opening the window, simply lift the faucet upward and lay it flat on the surface to leave enough space for the window to open

Easy Exchange Technology
Use just a coin to easily install or remove the aerator

Water Saving Technology
Save water resources

Comfort Height
The spout height is reasonable, making it easy to fill large containers

304 Stainless Steel
Made of solid stainless steel, strong and durable, with antibacterial properties

Quick Clean
Wipe gently to easily remove limescale

Purified Water Function
Get high-quality purified water directly from the kitchen faucet - saving time, money, and being environmentally friendly

Swivel Tube Spray
Features a 360° spring arm design, allowing free switching between spray and aerator modes

Thermoplastic Elastomer Hose
Comes with a flexible and hygienic kitchen thermoplastic elastomer hose

Pull-out Rinse Spray
Increases the operating range of the faucet, achieving different spray effects

Rotation Limit
Limits the rotation angle to prevent overflow

Magnetic Docking
Uses an integrated magnet for smooth retraction and docking of the spray head

Pull-out Dual-function Spray
Increases the faucet's operating range, allowing easy switching between aerator and spray modes

Durable
The surface is long-lasting, available from natural stainless steel to various PVD finishes

Precise Control
Smooth and precise control, allowing you to enjoy a comfortable water experience for life

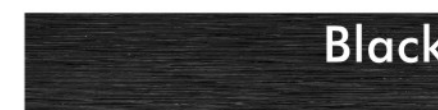

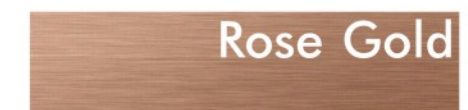

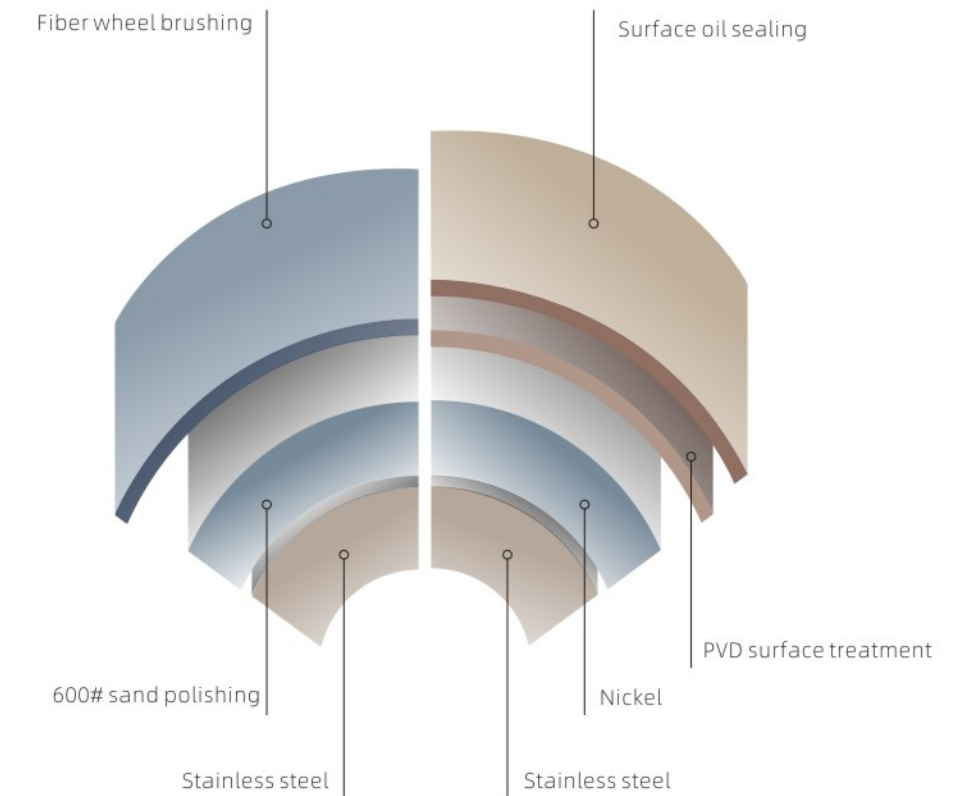

Materials and Surface Treatment Technology

Durable surface with unparalleled hardness and scratch resistance.

The Haiba Super Steel surface not only has these characteristics. The brushed stainless steel surface not only looks incredibly smooth, but also the scratch resistance of the innovative PVD coating is higher than that of chrome plating. Its daily durability is also very high. Fingerprints on the surface? Not here. The surface also does not retain microorganisms and bacteria, greatly reducing their numbers.

Therefore, the faucet surface is always hygienic and clean.
